

**Junior colloquium of the doctoral school CLI**  
**“Knowledge of memories & Memory of knowledge”**  
*Call for papers*

The PhD students of the doctoral school “Cognition, Language and Interaction” (CLI) of Paris Vincennes Saint-Denis University are happy to invite you to their **6th edition** of CLI junior researchers’ colloquium, that will take place on the 10<sup>th</sup> and 11<sup>th</sup> of October 2019, at Paris 8 University. This scientific event is an opportunity for young and advanced researchers to present their work and to discuss about a common theme. This year, these two days of scientific sharing will focus on the topic “***Knowledge of memories & Memory of knowledge***”.

*« Because a man without memory is a lifeless man, a people without memory is a people without future ». – Ferdinand Foch.*

Memory, in its broadest understanding, will be at the core of this sixth edition of CLI junior researchers’ colloquium. Through a multidisciplinary perspective, we address this year the question of the transmission, oral or written, implicit or explicit, of the knowledge that we possess, may it be scientific – i.e., scientific knowledge, acquired and conveyed by and for Science – or not – e.g., cultural traditions. However, wondering about the transmission of knowledge leads inevitably to the question of its conservation and transformation. The latter may occur through human – language, social interactions, cultural habits – but also, mathematical and IT processes and tools.

This colloquium will address three broad questions:

- 1) ***The transmission of knowledge***: How is knowledge transmitted? By what means – human or else – is this transmission possible and effective? What are the phenomena that prevent the transmission?
- 2) ***Conservation and transformation of knowledge***: How is knowledge stored? How is knowledge transformed? But also, why is it forgotten sometimes?
- 3) ***The role of Memory***: What is the use of Memory(ies)? And how do they contribute to define who we are and what we do?

This colloquium gathers various research fields around cognitive and social functioning: psychology, neurosciences, information and communication sciences, computer science, mathematics, language sciences, linguistics. Each of these disciplines, through their own epistemology and methodology, offers complementary perspectives, allowing to broaden the reflection about the question of transmission and conservation of knowledge.

This colloquium aims to promote young researchers’ work and to open the way for a reflection at the interface of different scientific fields. By giving an overview of the questionings that surround a federating topic, this event represents an opportunity to actualize and push the state of knowledge forward.

### **Submission instructions**

The CLI 2019 colloquium will comprised two types of sessions:

- **Oral presentations:** each presentation (about 30 minutes long) will be divided into two parts. The first part will be the presentation of the participant's research (between 15 and 20 minutes) and the second part will be devoted to a discussion with the audience (10 minutes). The use of visual support is highly recommended. Depending on the selected abstracts, roundtables and panel discussions could be organized.
- **Interactive workshops:** either traditional posters (A0 portrait format) or demonstrations of an application / experiment / results, live data processing, presentation of software or tests [...]. Media other than posters are therefore accepted. These workshops allow to favor the discovery of different fields of research, by facilitating interdisciplinary communication and interactions. Every participants of the colloquium (audience and speakers) will be invited to take part in these workshops (to pass a test, discover software, discuss data ...).

This call for papers is addressed to every PhD students and young researchers, from France or abroad, affiliated to a research laboratory.

Proposals are to be submitted in PDF format on the EasyChair website (registration is required), no later than **July 15, 2019**. For **both session types**, propositions must be submitted in the form of an **anonymous abstract**, in English or in French (maximum 1-page length, Times New Roman font, font size 12, line spacing 1,5, margins 2,5 cm). The references and supplementary material should figure on a separate page.

**NB:** any submission in which the authors' names figure in the PDF document will be automatically refused.

Submissions will be appraised by a scientific committee. Notifications of acceptance or refusal, as well as double-blind expert feedback, will be sent to authors as of **July 25, 2019**. Authors will then have 2 weeks to confirm or refuse their participation. In the event of acceptance, authors will be asked to return their abstract, corrected according to the comments made by the experts by **August 5, 2019** at the latest.

**Important dates (indication)**

Deadline for submissions	<b>July 15, 2019</b>
Beginning of notifications of acceptance (or refusal) and return of the expertises in double blind to all authors	<b>July 25, 2019</b>
Reception of final abstract (with author names)	<b>August 5, 2019</b>
Registration for the colloquium (free, but mandatory)	<b>Sept. 21, 2019</b>
CLI 2019 colloquium	<b>Oct. 10 &amp; 11, 2019</b>
